Call for Bids

Name of Project:	Updating Tiny MCE to Most Current Stable Version
Deadline for Bids:	05.11.2020
Hand in Bids to:	Matthias Kunkel, ILIAS e.V., info@ilias.de

Dear All,

the Technical Board of the ILIAS society hereby calls for bids for the aforementioned project.

ILIAS still uses Tiny MCE's versions 3.4.7 and 3.5.11. These versions have not been officially supported for a while now. To ensure the security of ILIAS 7 the Technical board would like to update the Tiny MCE for this and future versions to the currently supported branch (5.5.x) and implement this update as a security fix.

Details of the project are outlined on the next page. Please hand in your bids and a corresponding statement of work by email according to the information in the header.

Bids will be judged by the offered price and the details outlined in the statement of work. We are looking forward to your submissions.

Best regards,

Matthias Kunkel

on behalf of the Technical Board of the ILIAS society

Project Details

Name of Project:	Updating Tiny MCE to Most Current Stable Version
Latest date of delivery:	22.12.2020

Goals and Benchmarks:

- ILIAS from ILIAS 7 on uses the currently supported Tiny MCE stable release branch (currently 5.5.x) across its whole code base.

- The current functionality of Tiny MCE is kept (as far as possible).

Deliverables:

- Two PRs against the release_7 and trunk branches:

  ○ Adding support for the most current Tiny MCE 5.5.x to the Tiny MCE service including working versions of all (or most of) the currently used plugins.

  ○ Removing all code for Tiny MCE 3.4.7 and 3.5.11 from the Tiny MCE service

  ○ Replacing all the usages of the older versions of Tiny MCE through either the service or through direct inclusion of javascript-files.

- An explanation for the Technical Board early on in the process, if one or more plugins can not be made to work with the current version within a reasonable time frame.

- A README.md show-casing the usage of this service and supplying other important information.

General Conditions:

- The changes are first made in a PR against ILIAS 7 and after its merge by the Technical Board adapted for ILIAS Trunk if necessary.

- Some Unit Tests testing the service would be highly appreciated.
